ET Universal Underside Mouldings

- Many Underside mouldings use a grey tape that can be seen from the outside of the vehicle after installation, GGG uses an aggressive sticking black tape that blends with the frit on all six of our profiles for that professional OEM look.
- Our Closed cell Foam Mouldings ET202, ET203 and ET 206 provide incredible flexibility especially around tight corners.
- The integrated edge guard on the ET202, ET203, ET205 and ET206 easily aligns the moulding to the glass.

2016-18 "Carry-up" Vehicles

Based upon the best information available to us at the time of publication, including intelligence forwarded to us by Mitchell International, we have "carried up" those vehicles believed to be unchanged from the previous Model Year. Although we are confident that the majority of these vehicles are unchanged, there could be an unexpected glass change since some of the manufacturer data was unavailable at press time. As always, it is up to the installer to determine that the replacement glass is the same as the original glass. If the glass appears different, you should verify the vehicle application with your local dealer.

ADAS

In our continuing efforts to provide the industry with world class data and information, NAGS has included in this release notations that identify those windshields that have Advanced Driver Assistance Systems (ADAS). These systems may require specialized tools or equipment in order to calibrate or re-program. Where necessary, footnotes have been provided to read:

"May require specialized equipment; refer to Manufacturer's Service Manual for specific procedures. Labor time does not include calibration or programming."

Example:

FW04187 ^{a b c e} Windshield (Solar)(Electrochromic Mirror, Acoustic Interlayer, W/Lane Keep Assist, Rain Sensor)35.0 x 56.0

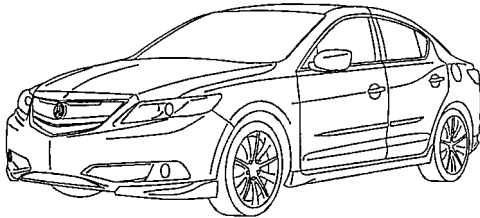

^a May require specialized equipment; refer to Manufacturer's Service Manual for specific procedures. Labor time does not include calibration or programming.
